WORK EXPERIENCE

Microsourcing / Eagleview Technologies   Jan. 2011 – Feb. 2024
Digital Delivery Quality Control
Quezon City, Philippines

- Conducted rigorous quality control assessments on digital products for property data, ensuring accuracy, completeness, and adherence to industry standards.
- Collaborated closely with the production team to provide detailed feedback and guidance on the correct execution of digital products.
- Actively participated in meetings focused on product enhancements, process improvements, and updates to quality standards.

PROJECTS

BABBLER | *React, Nodejs, ExpressJs, MongoDB, tailwind, React Query, JWT, bcrypt, Git*

- Developed a full-stack blog site incorporating robust features for user engagement and content management.
- Implemented user authentication using JWT tokens and bcrypt.
- Designed backend API endpoints for creating, reading, updating, and deleting blog posts.
- Integrated a voting system where users can Upvote and Downvote blog posts.
- Implemented sorting functionality to display blog posts by rating, calculated using the voting functionality.

RANDOMRECIPE | *React, NodeJs, Express, Typescript, React Query, MongoDB, Javascript, Tailwind, Git*

- Developed app for randomly exploring diverse Filipino culinary creations.
- Implemented a feature that allows users to view random recipe with each click or refresh
- Developed a search bar where users can input keywords to find relevant recipe
- Implemented system enabling users to rate the recipe
